**Gartner.**  
**Peer Insights™**

**The service is exceptional, the team is so professional and cares for our success. Cyber experts are always available for me and help analyze results.**

## All your attack surfaces, **tested continuously** with the Pentera Platform

### About Pentera

Pentera is the market leader in Automated Security Validation™, empowering companies to proactively test all their cybersecurity controls against the latest cyber attacks. Pentera identifies true risk across the entire attack surface, guiding remediation to effectively reduce exposure. The company's security validation capabilities are essential for Continuous Threat Exposure Management (CTEM) operations. Thousands of security professionals around the world trust Pentera to close security gaps before threat actors can exploit them.
